ARIENS

ARIENS DELUXE BUILT LIKE NOTHING ELSE

Here is why our powerful two-stage design has unmatched performance and durability.

- 1 It's simply the toughest out there.** It has largest-in-class, 14-inch diameter, fully welded steel serrated augers driven by the largest shear bolts available. That means it can cut through even the iciest packed snow.
- 2 The guts give it the glory.** The Ariens unrivaled, heavy-duty cast iron gear case creates the industry's fastest auger ratio, which means it's moving a lot more snow in a lot less time. Plus, it'll take a beating and keep on throwing because it's engineered with an alloy steel worm gear design and high-end synthetic gear oil.
- 3 Move 30% more snow 100% of the time.** With the largest intake tunnel and impeller in its class, the Ariens Deluxe pulls snow in and shoots it out – fast. And it's freeze-resistant, so no matter how frigid the weather is, you'll keep blazing right through.
- 4 Power on and on and on.** The only dual belt auger/impeller drive system in its class propels snow up and out of the chute; powerfully and continually. That means sustained power, a longer belt life and no need for adjustments.
- 5 Be higher to go farther.** It can take in so much snow and shoot it out so fast that the angle of the discharge chute is higher so the snow can fly further – up to 50 feet. And the all-steel construction chute can take whatever is sucked up into it – wet snow, ice chunks, even debris – stuff that would tear a plastic chute to shreds.
